SOFTWARE SOLUTIONS: THE INDUSTRY

Southeast Asia and Singapore Market

BMI forecasts that IT services are expected to post a CAGR of 5.8% from 2014 – 2018. Spending of SGD4.228bn is forecasted for 2018. This means that consumers are willing to spend more on IT services and systems and they acknowledge the positive impact that will be made on their company.

From year 2013 onwards, there is a steeper increase in the spending of cloud computing. The latest survey on cloud computing services in Singapore in July 2013 by Rackspace stated that Singapore's cloud adoption rate was 73%.

INTRODUCING **erpnext** OPEN SOURCE TECHNOLOGY

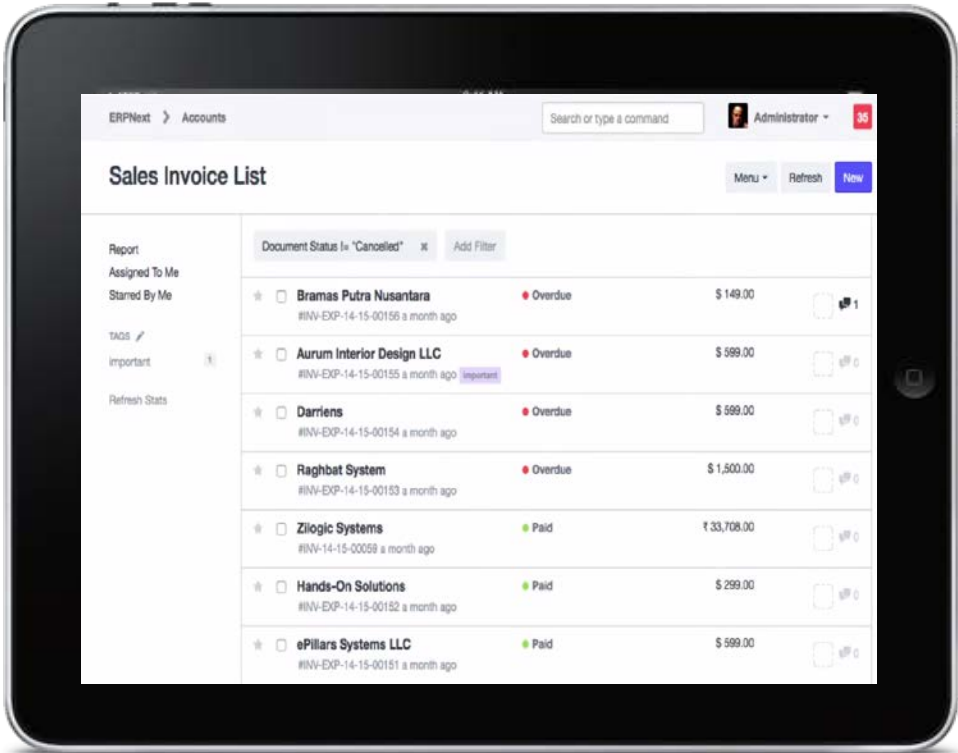

We offer ERPNext to our clients as we believe that ERPNext has the functionality to outfit SMEs. ERPNext covers Manufacturing, Retail, Distribution and Services that includes Financial Accounting, inventory, CRM, Sales, Purchasing, Human Resource and many more. ERPNext a simple and intuitive software that is developed on a web application framework, that allows you access it whenever and wherever.

Simple yet powerful.

OTHER ERP SOFTWARES

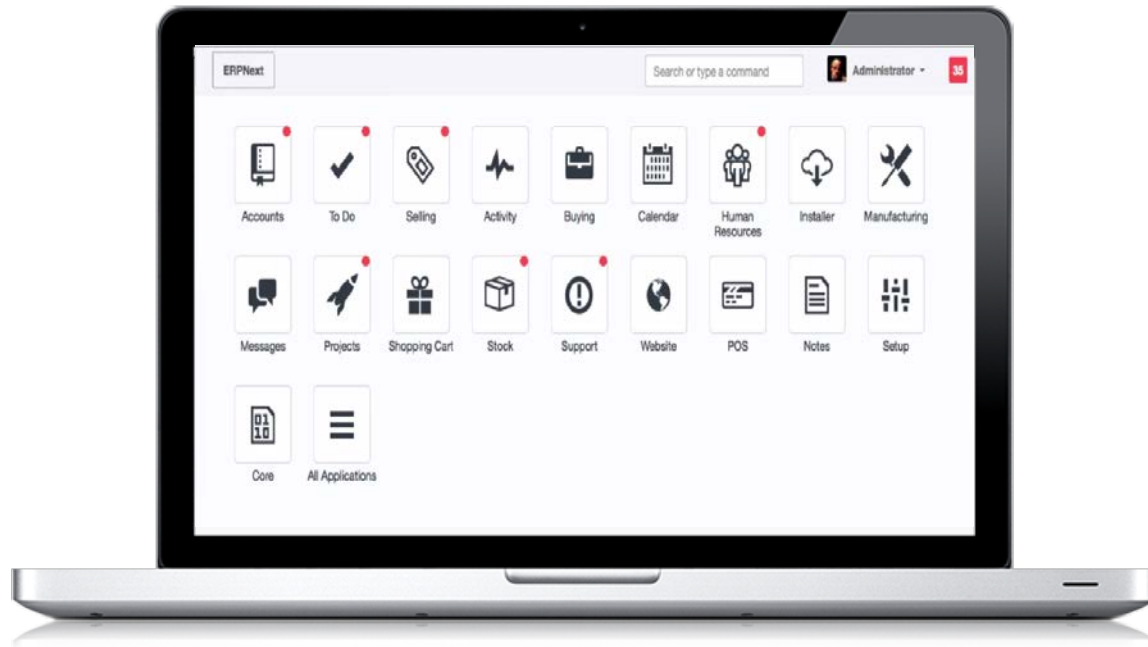

Lets face it, Enterprise Resource Planning systems can be pretty comprehensive. Yet, the learning curve is high and navigating through the ERP systems can be nightmare. At OpenB, we deploy ERPNext because of it's easy and simple to use navigation.

SELLING AND QUOTATION

Once your system is setup, you can keep track of communication with your Leads or Customers. You can send them Newsletters once in a while and send specific Quotations when they are ready to buy. When they place an order, you create a Sales Order.

INVENTORY AND BUYING

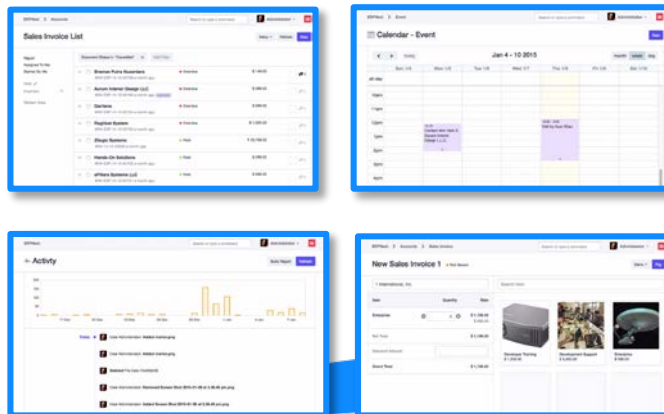

You can setup your inventory warehouses and manage the stock of your Items Batchwise or by Serial Numbers. Keep track of Items to buy by raising Material Requests, send Purchase Orders to your Customers and enter Purchase Receipts when you receive material.

MANUFACTURING NEEDS

You can plan your production and material by the Production Planning Tool. Then transfer and convert your raw materials to finished goods.

LEAVE, EXPENSES AND PAYROLL

With EPRNext you can manage Employee Leaves and manage and approve their Expense Claims. You can also generate monthly Payroll and integrate it with Accounting.
